Finja Tietjen

CORE COMPETENCIES

- **Technical writing:** research articles, popular science pieces, talks, tutorials
- **Audience adaptation:** from expert-level detail to plain-language explanations
- **Expert interviews:** gathering precise information
- **Stakeholder management:** fast feedback loops, clear and culture-sensitive communication
- **Project and review coordination:** managing drafts, deadlines and sign-offs across teams
- **Technical foundations:** physics, programming, data analysis, ML algorithms

PROFESSIONAL EXPERIENCE

PhD Researcher in Physics – Chalmers University of Technology, Göteborg

09/2023 – present

- Wrote and published peer-reviewed articles in academic journals and communicated results to specialist and non-specialist audiences
- Presented research at international conferences (Europe and USA), both to expert audiences and to audiences outside the field
- Discussed and clarified technical questions with experts from other areas of physics and chemistry, translating between subfield terminologies
- Wrote popular science articles and gave science slams and short talks for the general public
- Developed and taught tutorials for students
- Coordinated projects at several levels, including review and feedback cycles
- Used programming and data analysis (e.g. Python) to develop and verify scientific results

DEI Coordinator (part-time) – Chalmers University of Technology, Göteborg

07/2024 – present

- Project coordination in collaboration with university management, external guests and experts, and student initiatives
- Planned and organised events, workshops, social media campaigns and information material for diverse target groups on neurodiversity and diversity in team work
- Acted as a point of contact for doctoral students
- Influenced writing of policy documents

Science Communication Contributions (freelance / voluntary) *2017 – present*

- Interviewed experts and wrote articles based on these interviews
- Participation in Science Slams
- Member of the editorial board of the student magazine at NTNU Trondheim: planning of the issues, writing articles in English and Norwegian, editing articles
- Adapted the same topic for different audiences: press, students, colleagues and the general public

Intern – Max Planck Institute for Plasma Physics, Greifswald *05/2021 – 08/2021*

- Supported the public relations team with conducting interviews, translating field-specific physics terminologies to plain language
- Conceptualized an online escape room based on the research conducted at the institute, including sketches of the visuals

EDUCATION

PhD in Physics, Chalmers University of Technology, Göteborg *2023 – present*
Thesis (under preparation): "Non-Equilibrium States of Matter: Ultrafast Dynamics and Phase Transitions"

MSc in Physics, Norwegian University of Science and Technology, Trondheim *2021 – 2023*
Focus: Solid state physics; thesis: "RKKY Interaction in Unconventional Superconductors"

Study abroad: 3rd semester, Tallinn Technical University, Estonia *2018 – 2019*

BSc in Physics, University of Göttingen, Göttingen *2017 – 2021*
Courses included an introduction to cryptography and [relevant courses, e.g. computer science, statistics]

Abitur, Lichtenberg Gymnasium, Cuxhaven *2016*

SKILLS

- **Programming and data:** Python, C, Mathematica
- **AI/ML:** working knowledge of common algorithms, experienced usage in research contexts, critical evaluation of results and limitations
- **Tools:** LaTeX, Microsoft Office, different LLMs

LANGUAGES

- **German:** native
- **English:** fluent (C2)
- **Norwegian:** B1+
- **Swedish:** B1+

INTERESTS

I actively compete in middle-distance triathlon and enjoy multiple-day hikes.
